**Subject:** Just a couple of small edits to the briefing  
Draft Final Bridgeton Residential Sampling Briefing Paper v12162016-r7ARD.docx  
ATT00001.htm

I'm not sure if there is still time to edit this at all but I found just a couple of small things.

See Attached doc with track changes,

1. Slight wording change in one bullet of background section
2. Slight clarification to one statement in first bullet of next steps
3. Slight clarification to first bullet in highlights section and I corrected a typo related to combined thorium

Nothing major, my other comments aren't as crucial as the typo.

Tom
